Attention: Mr. Harry Condo
Senior Building Inspector

Re: Ralphs #132

Dear Mr. Condo,

This is to follow-up on the two Baker's Aid Ovens installed at Ralphs Giant, 851 West Sepulveda Blvd in Torrance. These units are UL Listed.

There was some confusion since the Model Numbers GRS-11 and GRS-12 did not correspond with the UL Numbers of Baro-1G and Baro-2G.

After several calls to UL, Mr. Ralph Fahmy of the Santa Clara office cleared up the matter. Approval was granted in 1984 at which time the Model Numbers were GRS-11 and GRS-12. The Model Numbers were then changed to Baro-1G or -2G which stands for Bakers Aid Rotary Oven, single or double rack and gas fired.

The factory has produced only UL Listed units for the United States since obtaining their listing in 1984. The units in question were produced during the 15th week of 1986.

The Economite DS 44 burner is the proper burner for the Listed ovens.

If you have any further questions, please call.

Sincerely,

Allen Dudden
ALLEN DUDDEN, P.E.
